
INFORMATIONAL ADVISORY

Dear Testa Customer,

This is an advisory to inform you of the current market of Green Beans.

The state of Florida has recently been experiencing record amounts of rainfall and flooding.

Due to the weather and flooding, the effects have hindered or destroyed many crops leaving a shortage of Green Beans.

The demand for green beans is extremely high and exceeds the supply available.

When the demand exceeds supply, like in this situation, the price rise like crazy. The price for green beans will remain in the higher 50s.

We are predicting the shortage will last for about 1-2 weeks, and supply will be an ongoing issue. Quality may be variable.

We will keep you informed as to the current green bean market and conditions.

Thank you,
Testa Produce Quality Assurance
