# COMMODITY UPDATE

---

Valued Testa Produce Customer,

This is an informational update on the supply of Green Beans, Cauliflower and Lettuce.

Green Beans - Cleaned green beans currently are at an extremely limited supply. For the first time in 25 years, our supplier was not able to ship out any product for the past two days. Orders have been cut by 50% and we are trying to accommodate our customers by substituting the regular green beans for the cleaned green beans. However, the market for regular green beans is very very tight, due to the fact that there is not enough product, and demands heavily exceed supply. We are trying to satisfy all of our customers, but since the supply is extremely limited we are doing our best with the little supply we are able to get.

Cauliflower - Is still a tight market, and available supply is on a day by day basis. We expect the market on cauliflower to be much easier in the next week.

Lettuce - The lettuce market is holding super strong at very high prices, but next week it will start to come down.

Thank you,

Testa Produce Quality Assurance
