## Produce Quiz

Last Quiz Answer:  
**CHERRY**

I am famous for playing hard to get, yet the few that are graced with my presence find me on a small tropical tree cultivated in parts of Vietnam, Thailand, Cambodia, Sri Lanka, and the Philippines. I am the reigning queen member of the Guttiferaceae family and am actually referred to as “Queen of the Tropical Fruits.” I grow at my own leisure, which is usually in a timely fashion, and I am difficult to propagate, even down right persnickety. My thick vibrant skin is strikingly handsome. I share the same purplish red skin color as a pomegranate, but I am far more beautiful, both inside and out. My insides are segmented into small pulpy white to ivory sections. My pulp is delicate, yet powerfully sweet and juicy. My exotic flavor has been described as a mixture of pineapple, apricot, orange and grape. Taste me and I will practically melt in your mouth. My pulp can be pureed and used as a topping for ice cream, sherbet or tossed in fruit salad. Most take delight in scooping me right out of my chilled skin. In Indonesia, lucky for them, I am actually abundant, and I am often used in recipes for pickles and vinegar. If you are blessed with fashion sense, you may be wearing my eye catching color on your belt, shoes, wallet or gloves because my skin contains tannins, used for dyeing certain materials. I contain potassium and vitamin C as well as traces of iron and niacin. If my name were broken down you would find the name of another member of the fruit family, but believe me there is no relation. Contrary to popular opinion I never had a Bar-Mitzvah and have no religious affiliations.
