Lettuce lower—about steady market, fairly light demand

Iceberg has a lower—about steady market, light demand *Wide range in quality, condition and price*

Romaine has a lower—about steady market, light—moderate demand *Wide range in quality and condition*

Peppers market ranges from lower—higher, light supply, moderate demand *Wide range in quality, condition and size.*

Tomatoes has a lower—about steady market, fairly light—moderate demand

Grape Type lower—steady market, good demand

Plum Type lower—about steady market, moderate demand *Wide range in quality and condition*

Potatoes & Onions

Onions, Dry have a steady market, moderate demand

Potatoes have a steady market, fairly light—moderate demand

Produce Quiz

Last Quiz Answer:
PAPAYA

One of biggest complaints we get is not being able to tell our customers when this shortage is going to end. Everyone understands the cold, the rains, and the freezing temperatures but then they here better weather reports and wonder where the good stuff is. One of the biggest problems caused by the severe rains is that plantings were actually missed. So, along with the current slow growth, there are fields that were left empty for weeks due to the soggy soil. From what we know there was only one round of plantings missed. Depending on the actual green (arugula, frisee, baby heads, etc.) there can be a 4 to 6 week gap. We have been in the weeds for about 3 weeks so expect this to go on for another 3 weeks as long as plantings can remain on schedule. In the meantime we are hit or miss on quality, size and availability for the immediate future. The only good news is that to date no other plantings have been missed. Weekly updates will continue.
