## B&W

WATERCRESS - Watercress is the only food to receive a perfect score from ANDI and the CDC. It's globally known as green, famous for its flavor and delicate crunch. With over 50 essential nutrients, watercress is a superfood offering a distinctive taste that stands out from many of the muted flavors other salad greens provide. For over 150 years, B&W has specialized in baby leaves, with a singular focus on quality. Since 1870, our varieties have been selected for superior flavor and consistent appearance.

ARUGULA- is a leafy green that packs a nutritional punch without skimping on flavor. We searched the world to find the perfect combination of flavor, heartiness, and consistency. B&W baby arugula is renowned for its woodsy, nutty taste—and for its ability to stand up to vinegar-based dressings and creamy sauces. It makes a perfect salad by itself or paired with other greens, and is also great on sandwiches, sautéed as a side dish, or sprinkled over pizzas and flatbreads. Arugula is an excellent source of vitamins A, C, and K, and a good source of calcium.

## red and green hues, our wild red watercress has a striking appearance, coupled with a slightly more intense peppery bite. It's

packed with color, taste, and

WILD RED WATERCRESS...

crunch, providing a pronounced and positive impact when added to salads, sandwiches, and entrées.
